

Dilshan Ansari

Full-Stack Developer & AI Automation Engineer

Dhanbad, Jharkhand, India indiasite13@gmail.com github.com/dilshanking7

dilshanking7.github.io

SUMMARY

Developer who designs, builds and deploys complete products — websites, backends, databases and AI automation agents. I work fast, I research what I do not know, and I stay with a project until it is live and working. Every project on my portfolio was designed, built and deployed by me.

SKILLS

Python · Django · JavaScript · Node.js · HTML & CSS · MongoDB · Google Sheets API · REST APIs · WebRTC · Automation · AI agents · Git & GitHub · Deployment · Database design · Problem solving

EXPERIENCE

Freelance Developer & AI Automation Engineer — 2025 — PRESENT

Self-employed · Remote

- Designing and shipping websites and automation agents for clients, from the first idea to a live, hosted product.
- Handling frontend, backend, database, API integrations and deployment without handing the work to anyone else.
- Researching each client's problem before proposing a solution, so the build fits the actual need.

Developer — DC — 2025 — PRESENT

Dhanbad, Jharkhand

- Building web products and AI automation tools as part of the DC team.

PROJECTS

Smart Janta — LIVE

School portal · attendance, results, notices, study material

A digital portal for a school in Khalari. Replaced paper registers and scattered messages with one place students, teachers and the office can all check. smart-janta.onrender.com

JustYou

LIVE

WebRTC video chat · peer to peer, no sign-up

Live video chat and social platform. Peer-to-peer WebRTC, encrypted, no account needed, matching in under 20 milliseconds. justyou.onrender.com

Deen-e-Islam

LIVE

Content website · mobile first

An Islamic companion website with reading and daily use, built to be calm and easy to read on a phone. deen-e-islam.onrender.com

IndiaSite

LIVE

Social feed platform

A social feed for India — posting, sharing and connecting. The project that taught me the most about scale and databases. indiasite.vercel.app

Instagram Automation Agent

IN PROGRESS

Python · AI agent · automation

An agent that creates and posts videos daily, replies to comments and answers direct messages without manual work. It reads the inbox, writes the reply and sends it.

Hinglish Voice Assistant

PERSONAL PROJECT

Python · speech recognition · TTS · system control

A voice assistant on my laptop. Wake word, spoken Indian voice replies, and control over files, apps, media and timers. Built with Python and edge-tts.

LANGUAGES

Hinglish (native) · English (professional working proficiency) · Hindi

AVAILABILITY

Available for freelance projects — websites, AI automation, backend and database work, and deployment. I reply fast and I can start immediately.
